

Review of Planning Instruments

At our last meeting I stated that I was concerned that we were accepting DA's which are flood affected, especially in the light of our DCP 28 having last been formulated in 1997.

Coincidentally the following Saturday Herald had considerable coverage of the predicted issues we will be facing from global warming and flooding. Sydney airport is expected to be flooded.

We need to reexamine our DCP in light of the State Government's latest report to ensure future Councils will not be faced with legal suits that claim we were negligent in our duty of care.

I would like to have this speech tabled for the record.
